

The Science behind

The Foundation of Health Begins with Sleep

It is estimated that one in three adults suffers from insomnia. Research has shown that poor sleep increases risk of anxiety, depression, weakened immune system, obesity, high blood pressure and a myriad of other medical conditions. Recent studies have found that individuals with persistent insomnia had a 97% increased risk of death. And treatment for insomnia has been limited to cognitive behavioral therapy and/or prescription medications, both of which can have negative long-term consequences.

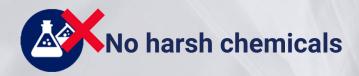

Sleep is the foundation to a happier and healthier life! Because if you have trouble sleeping, you will more than likely have trouble in other areas of your life. Now SleepCreme brings you the benefit of CBD for a better night's sleep in a silky-smooth antioxidant, topical nighttime cream. And SleepCreme is entirely free of Tetrahydrocannabinol (THC ...the psychoactive compound which produces the 'high' from marijuana use).

What is SleepCreme?

SleepCreme is the original and finest non-melatonin, CBD infused sleep topical on the market today. Made of all-natural ingredients, SleepCreme has been proven effective in helping users experience a better night's sleep.

What's Inside SleepCreme?

Clinically proven to help you sleep

100% Risk Free*

* SleepCreme offers a 100% risk free guarantee. SleepCreme may not work for everyone. If you are not satisfied, call us and we will refund you. No questions asked. You don't have to return the product.

How it Works

SleepCreme starts with high-quality, naturally enriched antioxidant creme infused with the absolute highest grade of 99% pure CBD Isolate.

The CBD Isolate is an all-natural, anti-anxiety and relaxation Cannabidiol extracted from industrial Hemp. It is entirely free of Tetrahydrocannabinol (THC... the psychoactive compound which produces the 'high' in marijuana).

CBD targets receptors in the endocannabinoid system throughout the nervous system. The result is a soothing remedy for racing thoughts and anxious ideas without many of the side effects of prescription medications.

SleepCreme's potency is up to six time the strength of industry standards. Simply rub SleepCreme generously on sensitive skin areas at bedtime such as stomach, feet and/or forearms, and be prepared for a better night's sleep!

SleepCreme is:

- 65% clinically proven
- · Free of chemical drivers
- All natural
- Emulsified
- 99% pure

Say "goodbye" to up-all-night!

Our proprietary blend uses all natural and predominately organic ingredients to produce the highest-grade sleep topical on the market. We manufacture SleepCreme in-house, using the latest in nanotechnology to mix CBD Isolate to 500 microns. SleepCreme contains no dangerous chemicals, NO melatonin, and is infused with six times more CDB than current industry standards require, and all without any THC. SleepCreme is truly one-of-a-kind.

What is CBD Isolate?

CBD isolate is a form of CBD, or cannabidiol, which is a chemical compound present in the cannabis plant. Unlike full-spectrum CBD products, CBD isolate does not contain any THC — the psychoactive component of cannabis. Manufacturers make CBD isolate by extracting all substances and compounds from the cannabis plant, leaving pure CBD behind. What's left behind is a pure crystalline substance that doesn't contain THC, terpenes, flavonoids, or other cannabis plant compounds - a single molecule compound that travels through the nervous system.

Anti-anxiety effects

Several studies indicate that CBD has anti-anxiety effects. It likely works by changing the way the brain responds to the chemical serotonin. In a recent study, 79% of the participants reported decreased anxiety, and 67% of people saw improved sleep scores within the first month. Researchers agree that CBD may benefit those with anxiety disorders and that most people tolerate it well.

SleepCreme Products

- SleepCreme Pro \$79.95 3000 mg of pure CBD Isolate
- SleepCreme Plus \$59.95 2000 mg of pure CBD Isolate
- SleepCreme \$39.95 1000 mg of pure CBD Isolate
